# Executive Summary

| Metric                      | Value |
|-----------------------------|-------|
| Total Findings              | 3     |
| Critical                    | 0     |
| High                        | 1     |
| Medium                      | 2     |
| Low                         | 0     |
| Informational               | 0     |
| False Positives (AI triage) | 0     |

## MASVS Category Breakdown

| Category         | Control                              | Findings |
|------------------|--------------------------------------|----------|
| MASVS-STORAGE    | Data Storage                         | 2        |
| MASVS-CRYPTO     | Cryptography                         | 0        |
| MASVS-AUTH       | Authentication & Authorization       | 0        |
| MASVS-NETWORK    | Network Communication                | 0        |
| MASVS-PLATFORM   | Platform Interaction                 | 1        |
| MASVS-CODE       | Code Quality                         | 0        |
| MASVS-RESILIENCE | Anti-Tampering & Reverse Engineering | 0        |

## Top 5 Critical Risks

---

**App can be installed on a vulnerable unpatched Android version 7.0, [minSdk=24]**

HIGH

MASVS: MASVS-PLATFORM-3 | CVSS: 6.8

This application can be installed on an older version of android that has multiple unfixed vulnerabilities. These devices won't receive reasonable security updates from Google. Support an Android version ⇒ 10, API 29 to receive reasonable security updates.

## Detailed Findings

---

**#86 — App can be installed on a vulnerable unpatched Android version 7.0, [minSdk=24]**

HIGH

MASVS: MASVS-PLATFORM-3 | CVSS: CVSS:3.1/AV:L/AC:L/PR:N/UI:N/S:U/C:H/I:L/A:N (6.8) | Status: not\_triaged

### Description

This application can be installed on an older version of android that has multiple unfixed vulnerabilities. These devices won't receive reasonable security updates from Google. Support an Android version ⇒ 10, API 29 to receive reasonable security updates.

### Affected File

AndroidManifest.xml

## #87 — Application Data can be Backed up

MEDIUM

[android:allowBackup=true]

MASVS: MASVS-STORAGE-1 | CVSS: CVSS:3.1/AV:L/AC:L/PR:N/UI:N/S:U/C:H/I:N/A:N (6.2) | Status: not\_triaged

### Description

This flag allows anyone to backup your application data via adb. It allows users who have enabled USB debugging to copy application data off of the device.

### Affected File

AndroidManifest.xml

## #88 — Broadcast Receiver (androidx.profileinstaller.ProfileInstallReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.DUMP [android:exported=true]

MEDIUM

MASVS: MASVS-STORAGE-1 | CVSS: CVSS:3.1/AV:L/AC:L/PR:N/UI:N/S:U/C:H/I:N/A:N (6.2) | Status: not\_triaged

### Description

A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.

### Affected File

AndroidManifest.xml
