AI Triage

LLM triage failed: Error code: 401 - {'error': {'message': 'Incorrect API key provided: your_ope*****here. You can find your API key at <https://platform.openai.com/account/api-keys>.'}, 'type': 'invalid_request_error', 'param': None, 'code': 'invalid_api_key'}}. Defaulting to true positive.

#91 — Broadcast Receiver (androidx.profileinstaller.ProfileInstallReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.DUMP [android:exported=true]

MEDIUM

MASVS: MASVS-STORAGE-1 | CVSS: CVSS:3.1/AV:L/AC:L/PR:N/UI:N/S:U/C:H/I:N/A:N (6.2) | Status: true_positive

Description

A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
